ABOUT US

Twilight Finland Oy is a Finland-based global education and innovation platform operating at the intersection of learning, industry, & international collaboration.

Headquartered in Finland, we design & deliver structured educational experiences that go beyond traditional classrooms, connecting students, educators, institutions, and organizations with real-world learning, global exposure, and future-ready skills.

Inspired by the globally respected Finnish education model, our approach emphasizes clarity, creativity, critical thinking, and real-world application.

Our programs are built to bridge the gap between academic learning and professional readiness, transforming knowledge into capability, & potential into performance.

Through international collaborations, we create pathways that empower individuals & institutions to grow beyond borders academically, professionally, and globally.

We work with a long-term vision to support the development of globally aware individuals who are capable of adapting, innovating, & contributing in an ever-evolving world.

Who We Work With : Our Global Ecosystem

Our Approach

We build practical, scalable partnerships focused on long-term impact and tangible outcomes.

Support For Students

01 Nordic Educational Journeys (Finland & Beyond)

More than a tour—this is a transformational 7–9 day global learning experience.

Students gain direct exposure to the world-class education system of Finland through institutional visits, innovation hubs, and real-world learning environments across 25+ destinations. The journey builds global perspective through sustainability learning, cultural immersion, and practical understanding of how modern societies and systems operate.

Each experience blends education, exploration, and reflection shaping confident, future-ready global learners.

02 International Internship Pathways

From knowledge to real-world execution.

We bridge the gap between academic learning and professional experience through structured, globally connected internship opportunities.

Our pathways provide :

- ▶ Versatile Opportunities : Access to paid, unpaid, virtual and in-person internships aligned with student profiles and program outcomes
- ▶ Industry Integration : Participation in live projects within real-work environments
- ▶ Professional Skill Development : Building communication, adaptability, teamwork, and problem solving capabilities
- ▶ Global Exposure : Connections with international organizations & professional networks

High-performing students may benefit from priority or enhanced placement opportunities, subject to performance & availability.

03

Innovation, Ideas & Startup Support

Shifting students from learners to creators.

This program builds an innovation-driven mindset, enabling students to think critically, solve real-world problems, and create meaningful value through hands-on learning, modern technologies, and structured frameworks.

Have an idea or an exceptional skill? Join us. Whether you're a student innovator or an early-stage startup, we support you in developing your idea or business through mentorship, guidance, and access to the right resources. The goal is not just to prepare students for the future, but to empower them to shape it.

**04**

Global Exposure & Networking

Building confidence through global connection.

We connect students to a diverse international ecosystem helping them develop perspective, communication, and confidence.

Students benefit from :

- ▶ International Interaction : Engagement with global peers, educators, and professionals
- ▶ Collaborative Platforms : Participation in academic, innovation, & exchange programs
- ▶ Cross-Cultural Understanding : Exposure to diverse perspectives, cultures, and working styles
- ▶ Early Network Building : Establishing meaningful global connections at an early stage

Support For Educators

Educator Training Programs :

From Teaching to Transformation

At Twilight Finland Oy, we offer structured training programs for educators & academic professionals, helping them move beyond traditional teaching and create engaging, effective, and future-ready learning environments.

A Global Invitation

Open to educators worldwide, including K-12 teachers, university professors, school leaders, corporate trainers, and all professionals committed to the future of learning.

1. Finnish Pedagogy Training Program :

The Finnish Pedagogy Training Program is designed for educators & institutions adopting Finland's globally recognized education approach. Offered as a short-term intensive or structured program, it focuses on practical classroom transformation. The training promotes student - centric teaching, conceptual understanding, & reduced rote learning.

It also fosters critical thinking, creativity, & student autonomy in inclusive learning environments.

2. International Faculty Training & Immersion Program (Finland) :

The International Faculty Training & Immersion Program is a structured, experience-based initiative conducted in Finland, typically over 7 days. It is designed for educators and academic leaders seeking direct exposure to global education systems through on-ground learning and institutional engagement. The program includes visits to leading Nordic schools, live classroom observations, & interactions with international educators. It also focuses on adapting global best practices into local teaching & institutional environments.

3. Innovation & Digital Teaching Training Program :

The Innovation & Digital Teaching Training Program prepares educators for modern classrooms through technology, innovation, and future-ready teaching practices. Designed for teachers & institutions, it supports learning through digital transformation & advanced pedagogy. The program focuses on AI in education, experiential learning, & the effective use of digital tools & platforms. It also helps educators foster innovation-driven thinking through interactive & engaging teaching methodologies.

Training Outcomes For Educators

**Advanced
Teaching Skills**

**Practical Classroom
Application**

**Digital & Innovation
Readiness**

**Global Exposure
& Perspective**

**Institutional Impact –
Capability to implement
meaningful change**

This is not just professional development.
This is structured educator training designed for real transformation.

UNIVERSITY PROGRAMS

University Partnerships: Bridging Academia with Industry

At Twilight Finland Oy, we collaborate with universities and higher education institutions as strategic partners—transforming academic potential into global, industry-ready outcomes.

Our programs are designed to integrate seamlessly with institutional frameworks, enhancing employability, global exposure, & academic excellence while maintaining flexibility and scalability.

01

Certified Professional Development Programs (CPDP)

Future-Proofing the Student Journey

Our CPDPs are structured certification programs designed to complement traditional degrees with **industry-relevant competencies**.

Key features include :

- **Industry-Aligned Certifications** : Integrated alongside university curricula
- **Hybrid Delivery** : Flexible online and blended learning formats
- **Core Competencies** : Focus on AI, digital transformation, innovation, and professional skills
- **Structured Assessments** : Clearly defined outcomes with measurable performance benchmarks

These programs strengthen academic offerings while enhancing student employability and global readiness.

02

Virtual Student Exchange Programs

Global Exposure Without Constraints

We enable cross-border academic collaboration through flexible, digitally delivered exchange programs.

Programs include :

- › **Interactive, Project-Based Learning** : Students collaborate on real-world challenges with international peers
- › **Global Perspectives** : Exposure to diverse academic & cultural environments
- › **Curriculum Alignment** : Fully customizable to institutional timelines and academic structures
- › **Scalable Access** : International exposure without logistical or geographical limitations

03

Faculty Development & Global Residency Programs

Elevating the Standard of Teaching

We empower educators through structured international exposure and training programs.

Programs include :

- › **7-Day Finnish Immersion** : Faculty visits to Finland for academic and pedagogical exposure
- › **Innovative Teaching Methods** : Training in student-centric, activity-based, and modern learning approaches
- › **Observational Learning** : Insights into advanced classroom environments and institutional systems
- › **Global Academic Exchange** : Interaction with international educators and thought leaders

This ensures faculty return with **practical, implementable insights** not just theoretical exposure.

04 Adaptive Scalable Institutional Models

Your Vision, Our Framework

We recognize that each institution operates within a unique academic and operational structure.

Our collaboration models are:

Fully Customizable :

Designed to align with institutional goals & curriculum frameworks

Seamlessly Integrable :

Easily embedded within existing academic systems

Scalable :

Suitable for both focused cohorts and large-scale institutional partnerships

Flexible :

Available as short-term programs or long-term strategic alliances

• Institutional Impact •

Enhanced Employability

Industry Alignment

Global Positioning

Academic Excellence

We don't just collaborate with universities.
We help position them as globally competitive, future-ready institutions.

Programs for Schools

Beyond Classroom Learning

01

International Exposure Programs

Students (Primary to Senior Grades) / Experiential / International

Our Nordic learning journeys are not mere visits—they are immersive academic experiences that place students within some of the world's most progressive education systems. Through direct exposure to global environments, cultures, and real-world contexts, students develop perspective, awareness, and a deeper understanding of how learning translates beyond the classroom.

02

Global IQ Competitions

Students (All Grades) / Academic / Competitive / Multi-Subject

Designed to move beyond memorization, our Global IQ competitions challenge students to think, analyse, & apply knowledge with precision. These platforms cultivate intellectual agility, problem-solving ability, and the confidence required to perform on an international academic stage.

Skill & Innovation Training Programs

Students (Middle & Senior Grades) / Training / Future Skills

Our training programs are crafted to nurture thinkers and creators. By introducing students to critical thinking, creativity, and emerging domains such as AI and digital technologies, we prepare them to navigate and contribute meaningfully to the future of work and innovation.

Global Learning Integration

Schools & Educators / Academic Enhancement / Training Support

We bring the essence of modern global education into school environments integrating progressive pedagogical practices and international perspectives. This enables classrooms to evolve into dynamic spaces that encourage participation, exploration, and forward-thinking learning.

Flexible & School Aligned Approach

School Management / Implementation / Scalable Model

Every institution is unique—and so is our approach. Our programs are designed to be flexible, seamlessly aligning with academic structures, student needs, and institutional goals, ensuring that each collaboration delivers meaningful value and sustained impact.

We don't just support schools.
We help shape environments where learning becomes
global, purposeful, and future-ready.

GLOBAL ACADEMIC NETWORK & COLLABORATION

An Elite Global Network: From Expertise to Impact

1. The Global Academic Network

A curated community of experts driving global learning

Our network brings together professionals who want to contribute beyond conventional roles and engage in meaningful, high-level collaboration.

Who belongs here :

- › Academic Leaders : Educators and researchers redefining teaching and learning frameworks
- › Industry Practitioners : Professionals bringing real-world insights into education
- › Mentors & Specialists : Subject experts across AI, sustainability, and emerging technologies
- › Innovators & Thought Leaders : Individuals shaping future-focused ideas and systems

This ecosystem is built on **knowledge exchange, collaboration, and real-world contribution not passive participation.**

2. Collaborative Program Development

Co-creating the future of education

We provide a structured platform for professionals to actively contribute to modern learning design and delivery.

Members engage in :

- › Co-Development: Designing new educational programs and global learning frameworks
- › Curriculum Enhancement: Integrating industry insights into existing programs
- › Case-Based Learning Design: Converting real-world experience into practical educational tools
- › Future Alignment: Ensuring content remains relevant to global industry and workforce needs

Our focus is clear : **education must evolve with the world—and be shaped by those who understand it best.**

Join the Network

An invitation to contribute, collaborate, and lead

Open to educators, institutions, and professionals worldwide who are ready to be part of a Finnish-led global movement in education innovation.
